2520080063 – CIAS PRACTICAL 1

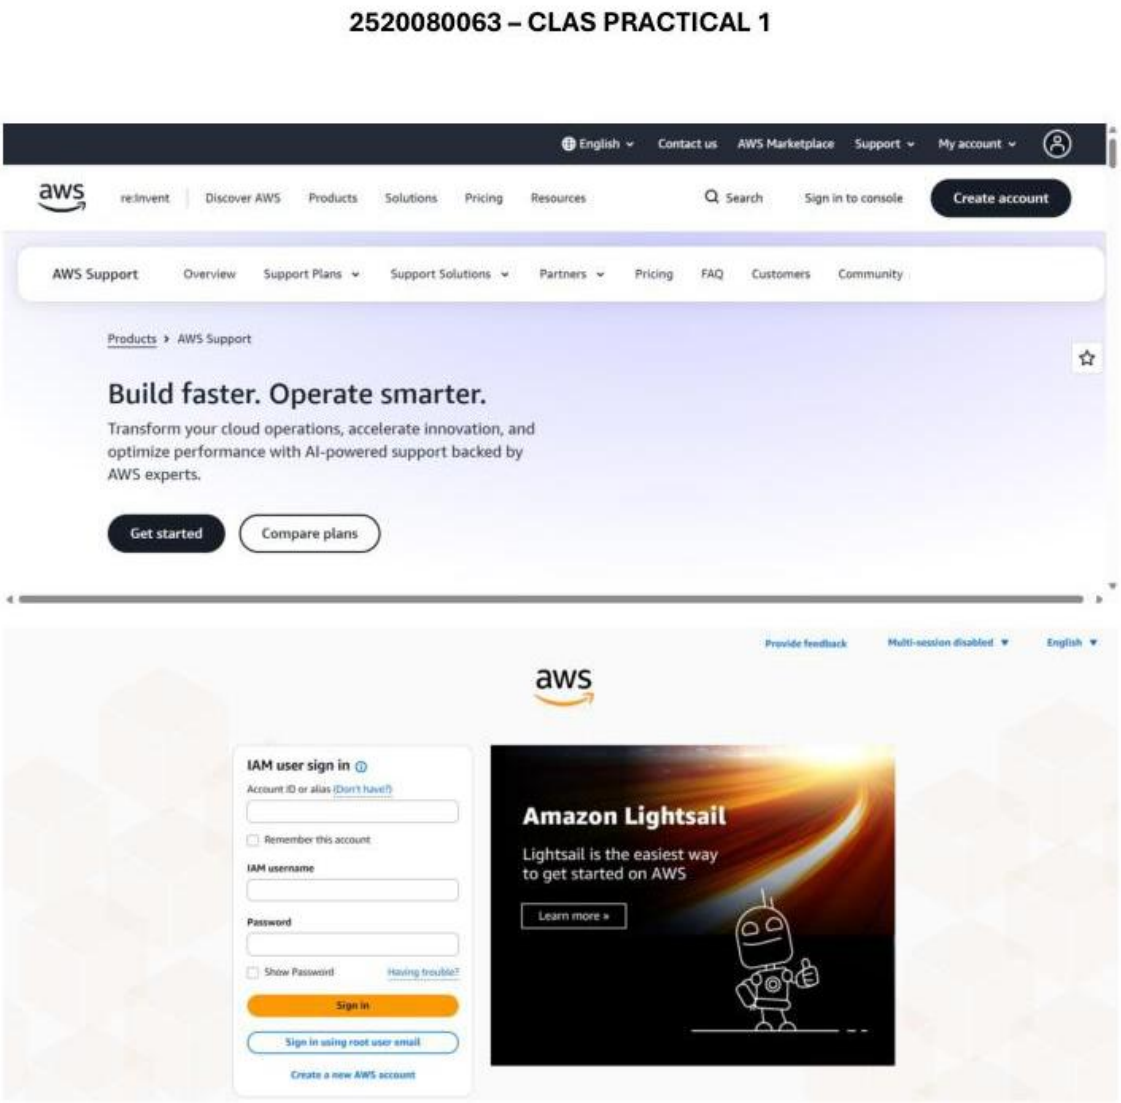

AWS Account Registration

Aim

To create an AWS account and complete the initial account registration and verification process.

Procedure

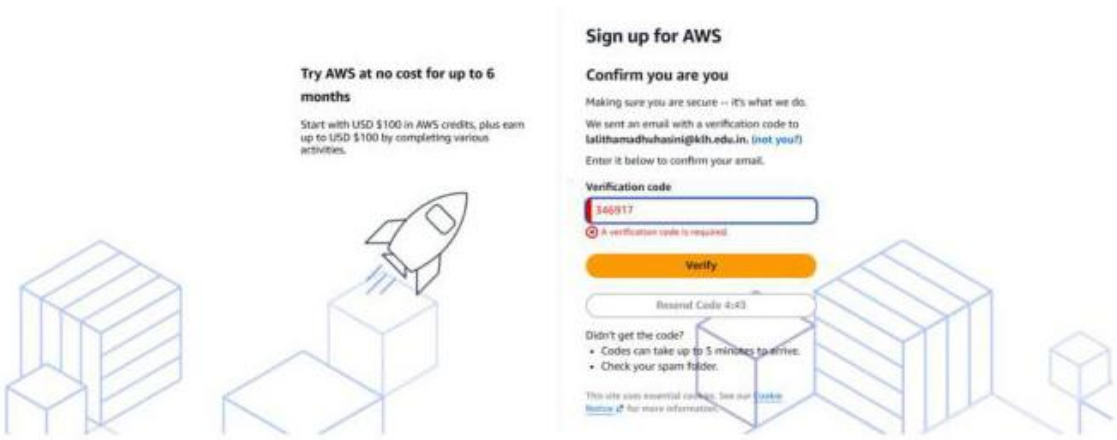

Step 1: Open the AWS website and access the console

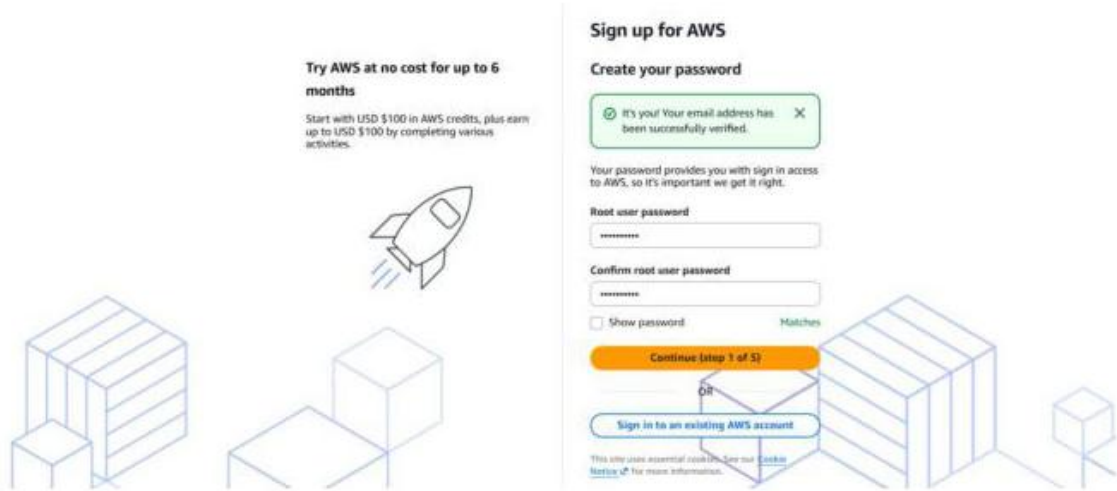

1. Open a web browser and visit https://aws.amazon.com/.
2. On the AWS home page, select Sign in to the console if you already have an AWS account.
3. If you are a new user, select Create an AWS Account to begin registration.
4. Existing users can enter their AWS sign-in details and select Sign in. New users should continue with the registration process.

Step 2: Register and verify your email address

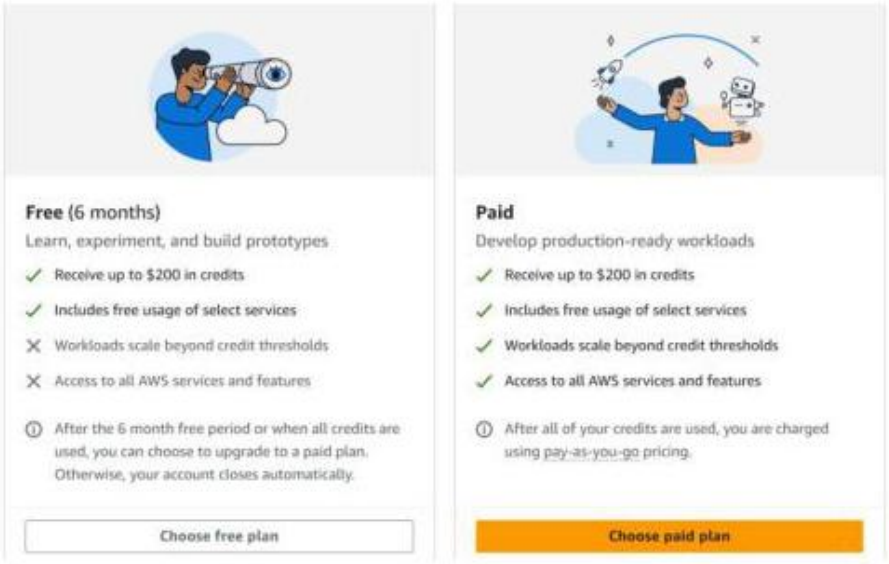

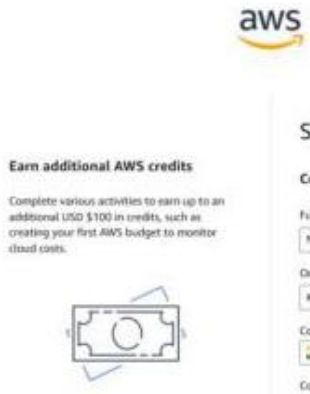

5. On the AWS sign-up page, enter your root user email address.
6. Enter an AWS account name in the required field.
7. Select Verify email address.
8. Open your email inbox and find the verification message sent by AWS.
9. Copy the verification code, return to the AWS sign-up page, enter the code, and select Verify.
10. Create a strong root user password and enter it again to confirm.
11. Select Continue to proceed to the next step.

Step 3: Choose a plan and enter contact information

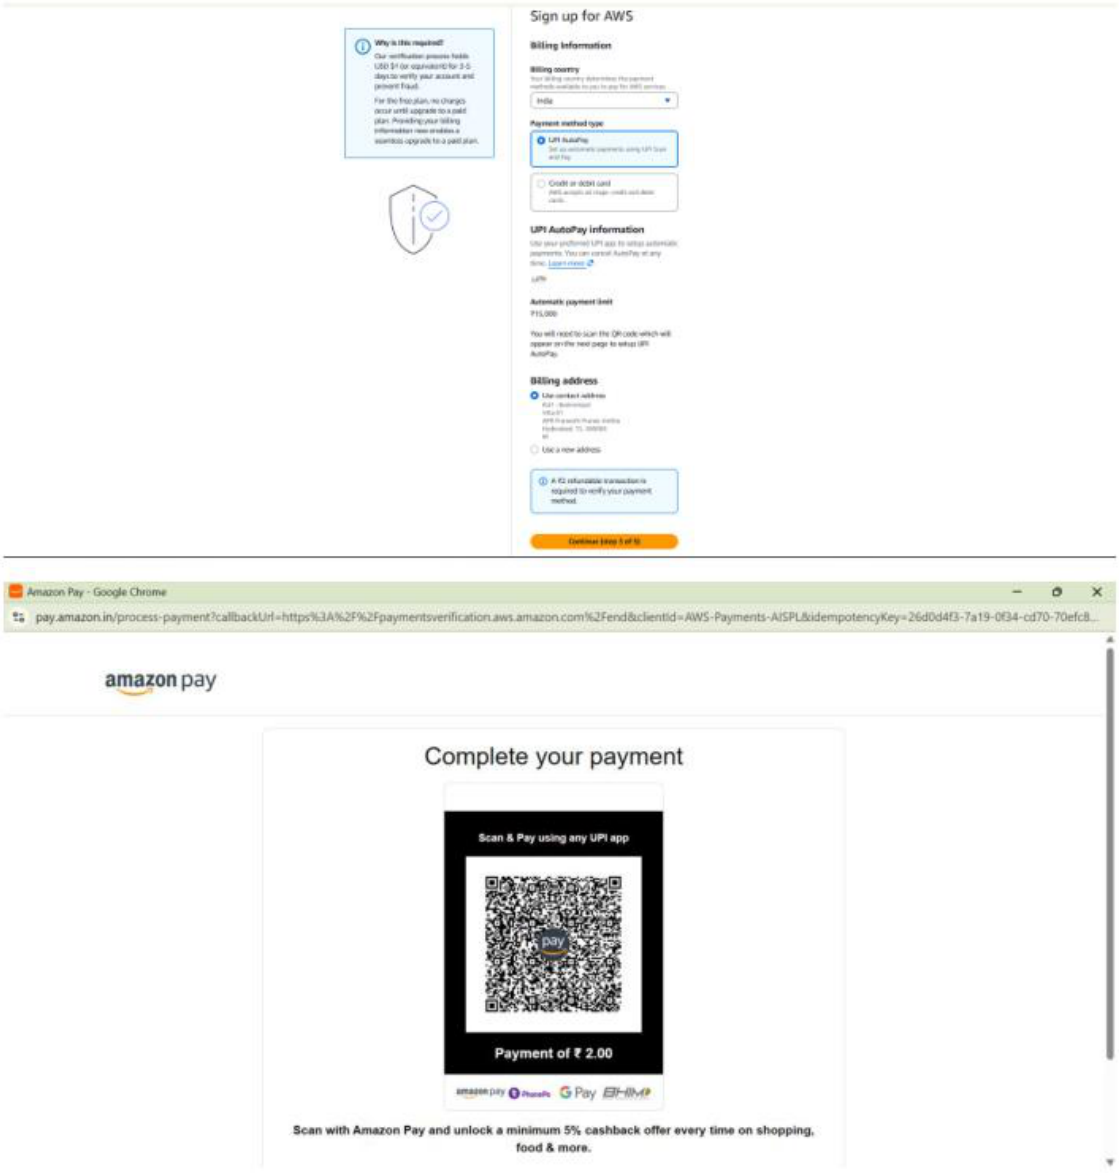

12. Review the AWS plan options displayed on the page.
13. Select the Free plan for the free-plan practical, if appropriate.
14. Enter your full name and contact number in the Contact information section.
15. Select your country or region and enter your address, city, state, and postal code.
16. Review the information entered to make sure it is correct.
17. Read and accept the AWS Customer Agreement.
18. Select Agree and Continue to proceed.

Step 4: Complete billing verification

19. Review the billing information displayed on the page.
20. Choose the available payment method. The supplied screenshot shows UPI AutoPay.
21. Enter or confirm the required payment details and billing address.
22. Select Continue to proceed to payment verification.
23. If an Amazon Pay verification page opens, scan the displayed QR code using a supported payment app and complete the on-screen verification.
24. Return to the AWS website and follow any remaining account activation instructions.
25. Wait for AWS confirmation before assuming that account setup is complete.

Result

The AWS account registration and verification steps were completed by following the AWS sign-up process.

Important Note: Use your own email address, phone number, contact details, and payment information. Do not copy personal information shown in sample screenshots. Payment verification requirements may vary depending on the account and payment provider.
